Senior Product Developer, Molecular Diagnostics [MS05] - Munich/Martinsried

Exosome Diagnostics is expanding our laboratories in the IZB in Martinsried. We are looking for an experienced medical device developer who can lead a core team through a regulated product development cycle, including CE marking and FDA application. As we are a small company you are expected to fill a lot of different roles and have a varied work day and a lot of responsibilities. We are looking for someone who is self-motivated in driving own projects and share experiences with other development programs in the German site and throughout the organization.

Key responsibilities include:

- Biofluid Molecular Diagnostic Product Development.
- Project management and supervision of Scientists and Technical Assistants.
- Core team leader of projects to develop LDT and IVD products.
- Report and document results and progress to colleagues and clients.
- Developing work routines and SOPs to aid in establishing a quality control system and a GLP environment.

We expect that you:

- Have experience with Medical Device development.
- Have 5+ years of industry experience, preferably from a Molecular Biology Laboratory.
- Are an experienced manager/supervisor of Scientists and Technical Assistants.
- Experience with molecular biology techniques such as nucleic acid extraction, amplification, sequencing and detection is an advantage.
- Have a relevant education, probably a PhD in a relevant scientific field.
- Are self-motivated and know how to prioritize and schedule your own very busy workday.
- Are comfortable with English in both speech and writing to allow close daily communication with colleagues, locally and at the company’s facilities in USA.
- Have high work ethics, high energy levels and a developed sense of humor.

We offer:

- A unique opportunity to be a part of a growing young company developing a cutting edge new technology for biofluid molecular diagnostics in personalized medicine.
- A responsible position with the opportunity to have influence and freedom to organize your own work.
- A dynamic working environment with many opportunities for personal and professional development.
- An attractive location in the IZB campus in Martinsried near Munich.

At Exosome Diagnostics, we foster a dynamic, entrepreneurial approach to translating cutting edge science into real clinical products to benefit patients and doctors. Exosome Diagnostics is a young company, working to commercialize a powerful new technology for Biofluid Molecular Diagnostics, offering the potential for significant corporate growth and enhanced career development. We encourage honest exchange of ideas and a culture of collaboration within the company to help the exceptional people who works here excel and to reach company goals.
