Scientist Product Development [MS03] - Munich/Martinsried

Exosome Diagnostics is expanding our laboratories in the IZB in Martinsried. We are looking for a Scientist to strengthen our product development team in Martinsried. As we are a small company you are expected to fill a lot of different roles and have a varied work day and a lot of responsibilities. We are looking for someone who is self-motivated and who can contribute independently to the product development programs in the German site.

Key responsibilities include:
- Molecular Biology and Biofluid Molecular Diagnostic Product Development laboratory bench work.
- Plan experiments, document results and report progress to colleagues and clients.
- Support of customer service projects.
- Develop and follow work routines and SOPs in a quality controlled GLP environment.

We expect that you:
- Have a relevant education, probably a PhD in a relevant scientific field.
- Have experience from a Molecular Biology Laboratory, preferably from industry.
- Are experienced in a variety of molecular biology techniques including nucleic acid extraction, amplification, sequencing and detection.
- Are meticulous, systematic, organized and a skilled pipet operator.
- Are self-motivated and know how to prioritize and schedule your own very busy workday.
- Are technology savvy and an experienced computer user.
- Are comfortable with English in both speech and writing to allow close daily communication with colleagues, locally and at the company’s facilities in USA.
- Have high work ethics, high energy levels and a developed sense of humor.

We offer:
- A unique opportunity to be a part of a growing young company developing a cutting edge new technology for biofluid molecular diagnostics in personalized medicine.
- A central role in building our expanding laboratory infrastructure.
- A responsible position with the opportunity to have influence and freedom to organize your own work.
- A dynamic working environment with many opportunities for personal and professional development.
- An attractive location in the IZB campus in Martinsried near Munich.

At Exosome Diagnostics, we foster a dynamic, entrepreneurial approach to translating cutting edge science into real clinical products to benefit patients and doctors. Exosome Diagnostics is a young company, working to commercialize a powerful new technology for Biofluid Molecular Diagnostics, offering the potential for significant corporate growth and enhanced career development. We encourage honest exchange of ideas and a culture of collaboration within the company to help the exceptional people who works here excel and to reach company goals.
