

Formycon AG, one of the leading Biosimilars companies, with a team of more than 90 experienced specialists, develops complex products following the complete development process, from analytics to clinical phases and until regulatory submission, health authorities approval and commercialization.

To support our team in Martinsried near Munich, we are looking for you to join us as soon as possible full-time as a:

Head of Project Analytics (m/f/d)

The Head of Project Analytics leads and manages the team of project analysts while also serving as a project analyst for one of Formycon's biosimilar programs. The project analyst is the single point of contact regarding overarching as well as in-depth analytical assessments for the assigned project. As such she/he interacts with a variety of internal and external customers and ensures the timely delivery of high quality analytical summaries in the form of key documents for development and submission.

Your responsibilities:

- Lead and manage the team of project analysts
- Ensure harmonization and leverage synergies across projects
- Be the single point of contact regarding analytics for internal and external customers
- Ensure harmonization of analytical activities/planning across projects and lead and plan analytical activities for assigned project(s)
- Ensure timely delivery of analytical project tasks in high quality
- Represent the analytical team in technical team meetings
- Closely interact with project management and laboratory heads
- Responsible for overarching documents with focus on analytics (e.g. analytical development masterplan, analytical similarity assessment, DS/DP comparability)
- Review and comment on documents with analytical focus from CMOs and CROs
- Participate in meetings with regulatory agencies (EMA, FDA)
- Together with experts on individual topics answer requests from authorities with a focus on analytics
- Present analytical project updates in internal meetings and in front of collaboration partners
- Contribute to budget planning activities
- Support method development / validation at CMOs and CROs

Your qualifications:

- Degree in biology, chemistry, biochemistry or a related field
- A minimum of 4 years' experience in the biopharmaceutical industry or a highly related field
- Experience in leading/managing a team
- Applied in-depth knowledge of (glyco)protein analytics
- Experience in working within a matrix setup
- Passion to deliver against tight timelines
- Fluent in written and spoken English. Basic German knowledge is considered advantageous

Bring in your expertise and develop your career in an interesting environment with your own responsibility. With Formycon there are challenging and highly interesting projects awaiting you, which you will bring forward with a qualified and committed team.

Have we sparked your interest? Then we look forward to receiving your complete application via the online application tracking system.
