To strengthen our **Immunology Research** Department in **Martinsried/Munich** we are searching for a qualified

Technician (f/m/d)

As a member of the Research Immunology team you will participate in the elucidation of basic immunological mechanisms influencing immune responses upon vaccination and infection and during cancer immunotherapy. Current projects include innate, adaptive, mucosal and anti-cancer immune responses.

Your tasks

- Perform in vivo vaccination and tumor studies with mice
- Assistance within the animal facility and monitoring of mice after appropriate training
- Performance of biological in vitro assays (e.g. ELISA, FACS, Luminex, organ preparation)
- Cell culture of primary cells and cell lines
- Documentation according to SOPs
- Participation in the general maintenance of the animal facility if required
- General maintenance of the Immunology Research laboratories

Your profile

- Biological laboratory assistant/technician qualifications e.g. MTA, BTA, CTA, PTA, or equivalent
- Experience in animal handling (mice)
- Experience in cell-based and immunological analytical methods, including standard cell culture techniques
- Good knowledge of virology and immunology
- Experience in Flow Cytometry and/or Luminex
- Good knowledge in standard computer programs (MS Office)
- Good documentation and communication skills in German and English
- Ability to work efficiently in a team and interest in working self-organized and independently

Your prospect

- An exciting position within an international environment and a highly motivated team
- Work at the forefront of vaccination research in a young and dynamic company
- Broaden your experience in immunology/virology

Contact

If you are interested in the position, we look forward to receiving your application in English via our internal system. Just click here [APPLY](#) and you will be redirected to our application site.
