To strengthen the **Quality Control Department in Martinsried/Munich**, we are searching for a qualified

Scientist in Quality Control (f/m/d)

Your tasks

- Responsibility for the daily management of routine testing of GMP samples (FACS based virus titration, gene expression analysis, molecular biology) including assay monitoring and trouble shooting
- Maintenance and improvement of the GMP quality standard
- Participation in routine testing as required
- Method transfer, method validation and training of colleagues in analytical procedures
- Preparation and review of technical documents (e.g. SOPs, protocols, reports, CoAs)
- Preparation and review of quality related documents (Change Requests, Deviation Reports)
- Development of new QC assays
- Equipment qualifications

Your profile

- Post-graduate (PhD) academic education in the bio/life sciences with experience in virology/vaccine development
- Experience in development, optimization and validation of analytical methods compliant to international guidelines
- Preferably industry experience in daily business under GMP or GLP
- Good theoretical knowledge and practical experience in virological and cell-based analytical methods including standard cell culture techniques
- Advanced application skills with Flow cytometry-based methods
- Willingness to take decisions and to work self-organized within a team
- Profound experience in MS-Office
- Profound English and German communication skills

Your prospect

- An exciting position in Quality Control within an international environment
- Working in a highly motivated team
- Broadening your experience in an internationally operating, biopharmaceutical company
