

## Working student for research project (m/f/d)

We are a young company specialized in project management of multidisciplinary public-private research projects. We are looking for support for a large international prostate cancer research project. Part of the project is about collecting meta data info from various prostate cancer trials, follow-up with data owners, curating a meta data catalogue, curate our list of data sets.

### This would be your work:

- take care of our list of identified data sets, update our collection
- contact international data owners
- curate the EMIF catalogue ([www.emif.eu/emif-catalogue](http://www.emif.eu/emif-catalogue))
- attend team telephone conferences, follow-up on action items, taking care of Sharepoint documents

### What we expect:

- experienced or interested in health data collections
- basic understanding of the principles of federated database system and clinical data models (e.g. OMOP [www.ohdsi.org/data-standardization/the-common-data-model](http://www.ohdsi.org/data-standardization/the-common-data-model))
- an advanced study (preferably epidemiology, public health, medicine, pharmacology or biology)
- experienced in Word, PowerPoint and Excel
- fluent in English
- hands-on mentality
- very good self-management
- autonomous
- good organisational skills

### What to expect:

- modern working atmosphere in a coworking office in the Werksviertel at Ostbahnhof
- flexible working hours including Home Office (approx. 8 hours per week)
- 14 € / hour

Start date of the position is as early as possible.

We look forward to your application.
