

## (Senior) Scientist (m/w/d) Mass Spectrometry - Protein & Analytical Sciences -

*Proteros is a privately held biotech company with a strong focus on technically challenging drug targets for small and large molecule drug discovery. Co-founded in 1999 by Nobel Laureate Prof. Robert Huber, the company has established a global service business with a proven track record with 100+ of global pharma and biotech partnerships in US, EU and JP.*

*Proteros' protein science team expertise includes detailed target know-how in particular protein- and lipid kinases, proteases, membrane proteins, cytokines, DNA binding proteins, biologics and the proteasome. Using a highly industrialized production platform and a broad range of analytical methods, industries top tier protein science delivers very demanding proteins and complexes in highest quality fit for purpose.*

### Main tasks

- Planning, development, implementation and optimization of mass spectrometry methods for the characterization of demanding proteins (e.g. for in-process control and final product analysis)
- Data evaluation, data interpretation and report generation in accordance with our internal regulations and the requirements of our customers in German and English
- Representation of scientific results as well as convincing and confident communication of the content to colleagues, customers and business partners
- Scientific and technical troubleshooting and maintenance of the laboratory equipment
- Continuous improvement of laboratory processes as well as evaluation of alternative technologies when expanding the MS method spectrum
- Effective use of synergy effects with and in exchange with other specialist departments

### Position requirements

- PhD or Master degree in the field of protein science with recent and extensive research laboratory experience
- Solid background in the field of LC-MS protein analytics (method establishment, practical implementation and analysis of protein samples)
- Experience in the field of protein science/ biochemistry, ideally comprehensive knowledge in analytical science
- Strong affinity and interest in taking on project management activities
- Enjoy working in interdisciplinary and international teams as well as excellent communication skills in English (knowledge of German is an advantage)
- Practical work experience in the pharmaceutical industry would be an asset

### Our offer

- an innovative profession in an exciting industry
- an inspiring working atmosphere as fertile ground for your further development
- a comprehensive training that prepares you optimally for your area of responsibility
- Multicultural teams and an open corporate culture

### Have we piqued your interest?

Then we look forward to receiving your informative application documents, stating your salary expectations and possible start date

### Proteros biostructures GmbH
