

## CLINICAL DATA MANAGER (F/M/D)

Munich or Berlin

Are you looking for a employment in a medium-sized CRO led by the owners? You will find the right place with a friendly and professional working atmosphere right in the heart of Munich or in our new office in Berlin.

### Your responsibilities:

- Act as the primary point of contact concerning data management tasks
- Development/Finalization of study specification (eCRFs, visit structure, edit checks) or set up databases and programming using SAS®
- Perform quality control of eCRFs (UAT) including the relevant documentation
- Write data management plans, data validation plans and other documents
- Ensure ongoing data cleaning, database lock
- Perform medical coding using MedDRA and WHO-DD
- Program and peer review data listings, summary tables and status reports in SAS®
- Data migration, data import, report generation
- Provide data management consulting
- Support maintenance and development of internal SOPs

### Your qualification:

- Degree in data science, medical documentation, computer science or equivalent
- Minimum experience of 3 years within data management (pharmaceutical industry and/or CRO, and/or biotech industry)
- Ability to work independently, accurately, and pro-actively within interdisciplinary teams
- Profound knowledge of the SAS® software and Microsoft Office® package
- Experience in setting up eCRF systems (e.g. Viedoc®, OmniComm®)
- Proficient in German and English (spoken and written)
- Strong organizational and time management skills
- Analytical and organizational skills, ability to set priorities and to meet Deadlines
- Enjoy working in a team

You can expect an interesting and diversified position in the heart of Munich or Berlin with flat hierarchies, short distances and a friendly atmosphere. You will work in different therapeutic areas for a variety of clients from pharmaceutical, biotech and medical device companies.
