

Bavarian Nordic is a fully integrated biotechnology company focused on the development, manufacturing and commercialization of cancer immunotherapies and vaccines for infectious diseases. The company has a diverse and growing portfolio of vaccines, supported by proprietary development, public-private partnerships and industry collaborations. The company was founded in 1994 and has been listed on the Nasdaq Copenhagen Stock Exchange since 1998. Headquartered in Hellerup and Kvistgaard, Denmark and with operations in Munich, Germany, Zug, Switzerland and North Carolina, USA, the company employs more than 400 people. Bavarian Nordic is an Equal Opportunity Employer. For more information visit www.bavarian-nordic.com or follow us on Twitter @bavariannordic

To strengthen our **Assay Development** department in **Martinsried/Munich** we are searching for a qualified

Technician (m/f/d)

The **Assay Development department** is a highly collaborative and dedicated group responsible for the development, optimization, characterization and validation of analytical methods such as immune assays that are required for the analysis of nonclinical and clinical samples generated during testing of Bavarian Nordic's innovative new vaccine candidates.

As Technician (f/m/d) in the Assay Development group, you will participate in this development, optimization, characterization and validation, thereby directly supporting the success of new vaccines. Excellent communication and interpersonal skills and the ability to effectively work as part of a team are essential for the position.

Your tasks

- Development, optimization, characterization and validation of bioanalytical procedures compliant to international guidelines, e.g. to investigate vaccine-specific humoral and cell-mediated immune response by ELISA, cell-based assays, flow cytometry or multiplexing technologies like Luminex
- Standard cell culture techniques for permanent cell lines and primary cells
- Method transfer and training of colleagues
- Preparation, presentation and reporting of results to the responsible supervisor and to the team
- Preparation of technical documents like SOPs
- Maintenance and qualification of laboratory devices

Your profile

- Biological technician qualifications e.g. MTA, BTA, CTA, PTA, or equivalent
- Experience in immunological and cell-based analytical procedures including standard cell culture techniques
- Preferably experience in virology/immunology
- Willingness to work in a team
- Good experience in MS-Office
- Good English communication skills
- Good understanding and application skills with bio/immuno-laboratory devices

Your prospect

- An exciting position in Assay Development within a highly motivated, talented team
- The chance of professional development through our dynamic company structure
- Broadening your experience in an internationally operating biopharmaceutical company

Contact

If you are interested in the position, we look forward **to receiving your application in German or English via our internal system with your annual salary expectations and the next possible start date.**

Just click [here](#) and you will be redirected to our application site.

We kindly ask recruitment agencies/headhunters to refrain from contacting Bavarian Nordic GmbH. Unsolicited documents will not be considered.
