

**FOUNDATION
MEDICINE®**

Director for Laboratory Operation (m/w/d)

PENZBERG, GERMANY

Foundation Medicine is leading a transformation in cancer care, where each patient's treatment is informed by a deep understanding of the molecular changes that contribute to their disease. As a molecular information company, we are focused on fundamentally changing the way in which patients with cancer are treated. Our products provide more than information. They offer hope to patients, their families and friends, their physicians and caregivers.

As a member of the Foundation Medicine team you'll work with everyone fighting the disease patients and their families, payers, physicians, drug developers to raise awareness about this transformation in cancer care and Foundation Medicine's role to ensure we're delivering the tools and information they need to make an impact and drive access for patients everywhere. Foundation Medicine is headquartered in the heart of Cambridge, MA. Since October 2017, FMI Germany GmbH in Penzberg has been actively supporting this mission.

Your Team

This position is part of the FMI Team Penzberg, which currently consists of approx. 50 employees from various functions. Our mission is the preparation, sequencing and analysis of tissue and blood samples from cancer patients to produce a report that supports the personalized treatment of the patient. The start-up mentality and a high degree of team spirit distinguish us, which is reflected in fast decision making, mutual support and a high degree of trust. Many joint team events do not neglect fun and good food. For two years we have been making a real contribution to the lives of many patients worldwide. In order to continue to do this successfully and to enlarge our international footprint, we are seeking to add a **Director for Laboratory Operation** to our rapidly growing team in Penzberg, Germany.

Key Responsibilities:

- Manage the Laboratory Operations department including the diagnostics team, the reagent QC and materials management team as well as product improvement and product transfer team
- Ensure the Foundation Medicine laboratory conducts diagnostic procedures in accordance with local regulations and company policies and procedures
- Transfer/establish and validate new assays for clinical operations according to ISO 15189 standards including generation of validation plans and reports
- Work with Quality Assurance to review, manage, and improve, where necessary
- Maintenance and continual improvement of the Laboratory Operations workflow and FMI products
- Prepare and review operational metrics and other data for executive management on a regular basis
- Staffing the team with appropriately credential technical and professional employees
- Lead professional development and retention efforts for team members
- Develop, plan and recommend budget, capital equipment, and staffing changes to accommodate a rapidly growing highly esoteric testing business as required
- Work with management team on short and long term strategic planning for the clinical lab operations for existing and new products
- Work in close alignment and build strong relationships with our FMI-colleagues in Cambridge and North Carolina
- Maintains extensive knowledge of relevant fields and techniques.
- Position requires ability to travel internationally (up to 20%).
- Other duties as assigned by manager.
