

To support Company growth and ensure production proceeds smoothly and in a timely manner, we at metabion are looking to welcome a:

### Supply Chain Specialist (f/m/d)

As a critical member of the Supply Chain Team the tasks are challenging and diverse with the aim to deliver on the Supply needs of Production and the Company in general. The Supply Chain Specialist is part of a team responsible for all supply related activities within the Business Unit, being Inventory Management, Material Planning, Purchasing, Incoming Goods Acceptance, Warehousing.

**metabion** is a leading globally supplier of Custom Nucleic Acids renowned for its focus on reliable supplies of consistently high quality products and services. Founded in 1997 in Munich/Martinsried, metabion's customer base rapidly spread throughout Europe and beyond. Academic, government, and commercial scientists in the field of life sciences appreciate **metabion's** "best value" approach. Key to metabion's ongoing success is to never compromise on quality while scaling up to meet our expanding customer base and their demands. metabion employees are creative, innovative, and ambitious to support the healthy spirit of its employees and customers.

#### Duties include:

- Manage and monitor supply chain KPI's, the supply of material required for the Production of Oligonucleotides
- Communication with suppliers, maintain professional relationships while promoting Company values (quality first)
- Work to identify opportunities to improve effectiveness, lower costs or reduce risk
- Identify demand and supply imbalances, perform supply cost reduction analyses
- Engage and contribute to business process improvements
- Support supply contract negotiations in alignment with company supply strategy
- Achieve Inventory and Customer service targets
- Prioritize and balance workload of multiple assignments based on business and functional activities

#### Your Profile

##### Skills and Experience

- 5+ years of progressive supply chain experience within a related industry
- University degree, preferably in supply chain, operations, business or related field
- Strong problem solving and analytical skills; experience analyzing inventory (overstock, under stock, defining optimal inventory levels)
- Exceptional communication skills, both verbal and written, German and English
- Ability to manage tight deadlines, prioritize workload and achieve effective results
- Strong appreciation of data integrity and clear process definitions
- Ability to exercise good judgment and utilize decision making skills
- Skilled knowledge of ERP software, preferably SAP, knowledge of Excel and MS Office programs

#### What you can expect

- Versatile and innovative product portfolio
- Positive Company culture in a future and internationally-oriented company
- Development opportunities
- Secure job in a crisis-proofed industry
- Free space for ideas and the opportunity to grow in an exciting environment

We provide a safe, clean, fair and respectful, prosperous and healthy work environment, where people are inspired and successful. **metabion** is committed to creating a diverse environment and is proud to be an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, gender, gender identity or expression, sexual orientation, national origin, genetics, disability, or age.

If you have the skills and qualifications for this position, please send us your details (application letter, curriculum vitae, references, certificates and salary expectation) to Diana Yulafci at [careers@metabion.com](mailto:careers@metabion.com).
