

Sourcia is a full service CRO tailor-made for small to medium-sized companies with offices in Gräfelfing (Germany), Zevenbergen (the Netherlands).

We are growing and are looking for colleagues at our offices in Gräfelfing:

Clinical Research Associate / Junior Project Manager

As Clinical Research Associate / Jr. Project Manager (f/m/n) you comprise an integral part of the research team. You are actively supporting the conduct of our international clinical trials with monitoring but also managing project teams in all aspects in the conduct of our international clinical trials.

Work activities include:

- Coordinating with the Ethics Committees / Regulatory Authorities and managing efficiently study start-up
- Identifying and assessing the suitability of clinical sites and identifying investigators (feasibility)
- Setting up the trial sites, training the site staff to trial-specific industry standards
- Monitoring the trial throughout its duration
- Maintain ongoing contact with sponsors, vendors and project team
- Manage Timeline and Budget
- Study Status Oversight and Tracking
- Oversee and lead other CRAs and Coordinators
- Supporting clinical trial documentation and Trial Master File management

Your profile:

- Degree in Life Science or equal experience in clinical development / monitoring
- In-depth experience of clinical trial processes
- First experiences in international Project Management in clinical research
- Thorough knowledge of ICH GCP and associated EU Directives governing the conduct of clinical trials
- Excellent organizational skills with high attention to detail
- Ability to work in cross-functional, multi-national teams
- Ability to manage, prioritize, and routinely report progress on multiple projects and tasks
- Strong presentation skills to internal professionals and external collaborators

We are looking forward hearing from you – please send your application to info@sourcia.eu
