

Associate Scientist Biostatistics (f/m/d)

What we offer

We offer an exciting and impactful role in a highly professional, cooperative and appreciative environment, where you can actively help shaping the success of the company. We offer a flat organization, a competitive salary, flexible working hours and home office, a company pension scheme and last but by no means least a highly transparent company culture. As a growing company, we strive to hire, build and keep our employees long-term.

Main responsibilities

- Partner with R&D project leads during the entire lifecycle of a development project
- Plan and implement DoE (Design of Experiment) methodology for setup of laboratory experiments
- Analyse and evaluate experimental data by quantitative statistical methods (e.g. regression modelling, time-series)
- Support and consult R&D project leads providing clear and precise interpretation of statistical evaluations
- Be eager to research and apply new scientific techniques for data analysis and long-term predictions
- Provide customized graphical visualizations of experimental data (ggplot2 is your friend!)
- Perform data management, standardization and data cleaning tasks on scientific datasets
- Secure compliance with data integrity and adherence to data nomenclature conventions
- Improve data processing workflows and engage in code quality via peer-review processes

Qualifications

- Scientific degree (MSc or equivalent) in Statistics, Data Science or a Life Science subject with a strong background in applied statistics
- Advanced skills in R programming language are a must, Python skills are a plus
- High sense of quality paired with a diligent and efficient working style
- Ability to perform in a high-paced but structured environment, following process workflows and code-reviews
- Practical working experience in biopharmaceutical industry is beneficial but not essential
- Excellent and adaptive communication skills in English and/or German as well as enthusiasm for working in an interdisciplinary and international environment

About us

Leukocare AG is a fast growing, international biotech company located in Martinsried near Munich. Based on our technology platform, we develop superior and innovative drug product formulations combining state-of-the-art analytical technologies with innovative bioinformatics approaches. Together with our partners within Pharma, Biotech and the Medical Devices sector we apply our formulation technologies and expertise to stabilize complex proteins, vaccines & viral vectors as well as medical devices in a broad range of indications and settings.

We look forward to your online application under <https://career.leukocare.com/apply?id=26a905>
